

# Medication Refill Request

Refill Policy: For the best care and safety of our patients we have a medication refill policy in place. As a private clinic dispensing medications there are rules and regulations established by the Board of Pharmacy we must follow. The Providers at Wellness District Medical Weight Loss will refill patient medications at each monthly recheck. This provides each patient with a 4 week supply of medications and should last them until their next visit. Once patients have established a good relationship with the clinic, we allow for one emergency medication refill without coming in for a monthly recheck. No patient is guaranteed a refill. A Provider will take a look at your chart and medical history and will make a decision based on the individual patient. Medications cannot be dispensed without a Provider on site.

\*Patients only receive one medication refill per calendar year. Please use only in emergency.

\*Patients must have an upcoming appointment in order for refill to be approved.
